

IT White-listing Information

2015 BEST PLACES TO WORK IN MAINE

All participating employees will need Internet access. If individuals do not have their own computer, you may want to set up a workstation in a private area for employees to use. If your company uses a third party IT vendor to filter email, you will also need to provide this information to them. You will need to adjust all filters and firewalls in order to ensure the invitations reach employees.

Requirements for External Emails

Employees will need to receive email messages from the following sources:

Email Addresses

Surveys@BestCompaniesGroup.com

JackieM@BestCompaniesGroup.com

Domains

bestcompaniesgroup.com

surveys.bestcompaniesgroup.net*

www.bestcompaniesgroup.net

IP Addresses

DNS: smtp2w.vovici.com

IP: 205.140.240.90

DNS: smtp3w.vovici.com

IP: 205.140.240.91

DNS: mail3.vovici.com

IP: 205.140.240.95

DNS: mail4.vovici.com

IP: 205.140.240.96

- Please ensure your spam filters and security settings allow multiple emails to your organization originating from these addresses.
- Depending on the number of employees surveyed, you may need to open up your company's rate limiter to allow 400 (or more, if you survey all employees) emails at one time from Surveys@BestCompaniesGroup.com.
- Some spam filters also rate the text of an email message. For that reason, BCG will send an IT test to both the primary contact and the IT contact at participating companies a few days before the start of the online employee survey. The test will include an actual employee survey invitation to ensure that the message can get through your company's spam filtering system.

**You will not be able to access this domain until the day of the employee survey launch.*
